

SACRED  SHAPES

GEOMETRIC FORMS

These sacred geometric sculptures are called Sacred Shapes. They are precisely composed, 3-dimensional sculptures that radiate an energetic field which can positively influence your environment and help create a sacred space.

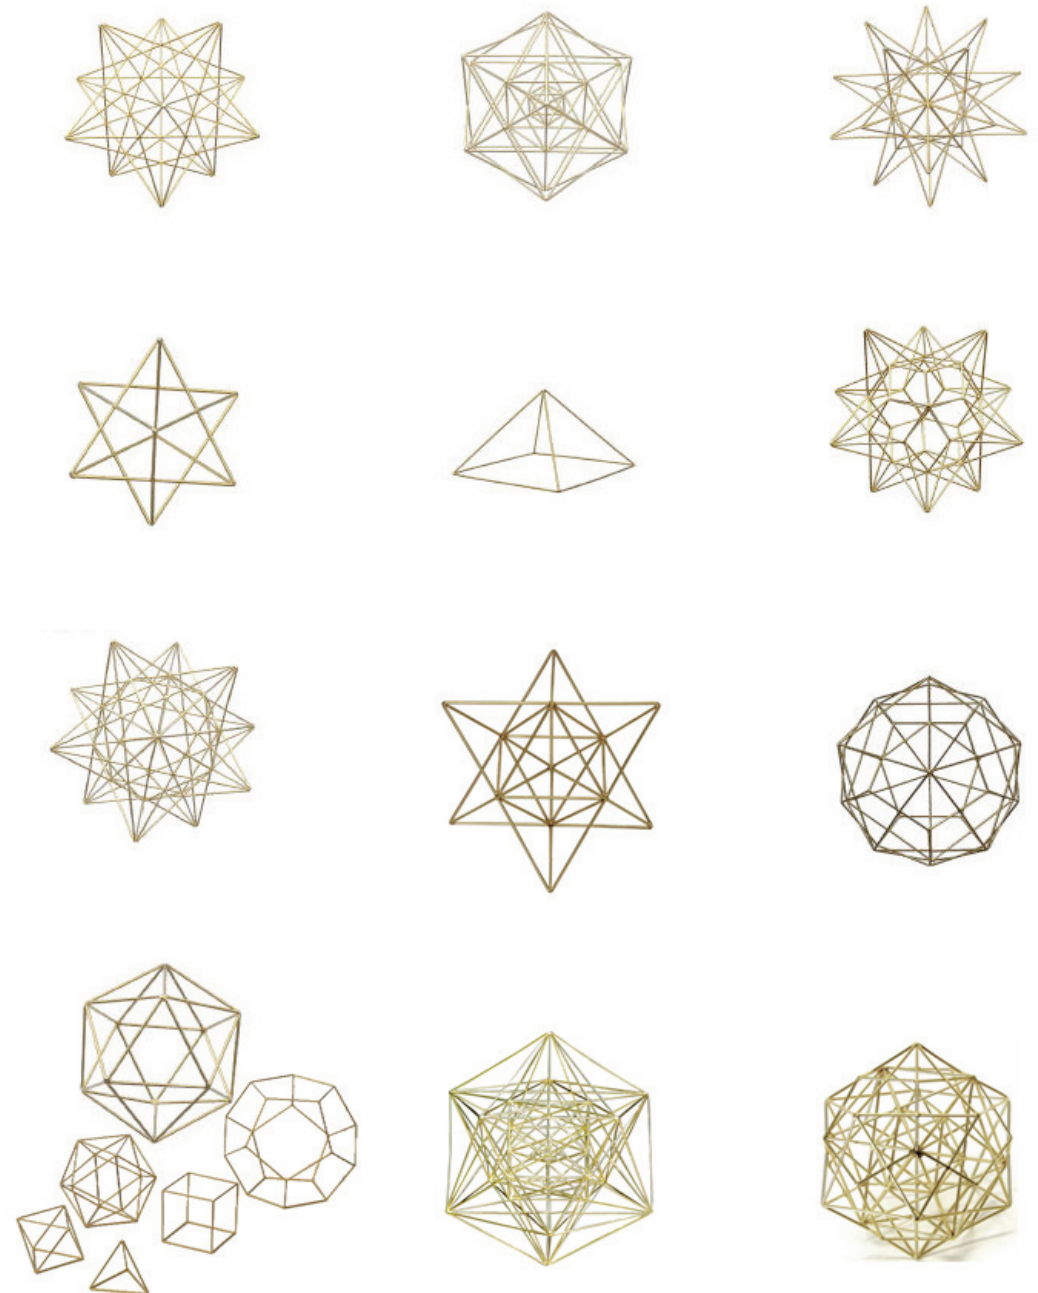

From the earliest origins of culture, it was known that the entire structure of the Universe is based on the eternal laws of creation, which are mathematical and geometric in nature.

These Sacred Shapes manifest the archetypal laws into a tangible experience enriching one's life. They can create awareness and empower you in making appropriate choices. Their beauty and perfection can bring peace to your heart and mind. This positive amplification of safe, subtle energy can activate creativity, healing, dreaming, meditation, and relationships.

Each time that you turn the Geometric Form and look at it you are getting different parts of oscillating frequencies that are moving both the left and the right hemispheres of the brain. When you are using the creative side of your mind and the linear side of your mind you are building synaptic energy without thought, you are building it with Mind.

Some of the shapes in our collection:

- Stellated Dodecahedron**
- Icosadodecahedron**
- Merkaba Star Tetrahedron**
- Stellated Icosahedron**
- Metatron**
- Giza Pyramid**
- Platonic Solids**
- & Large Forms**
- Stellated Earth Grid**
- Cosmic Seed**
- Cube Octahedron**
- Rhombic Tricon**

INSTALLATION IDEA

Our Sacred Shapes are extraordinary tools which enhance health and inner awareness by working with subtle energies.

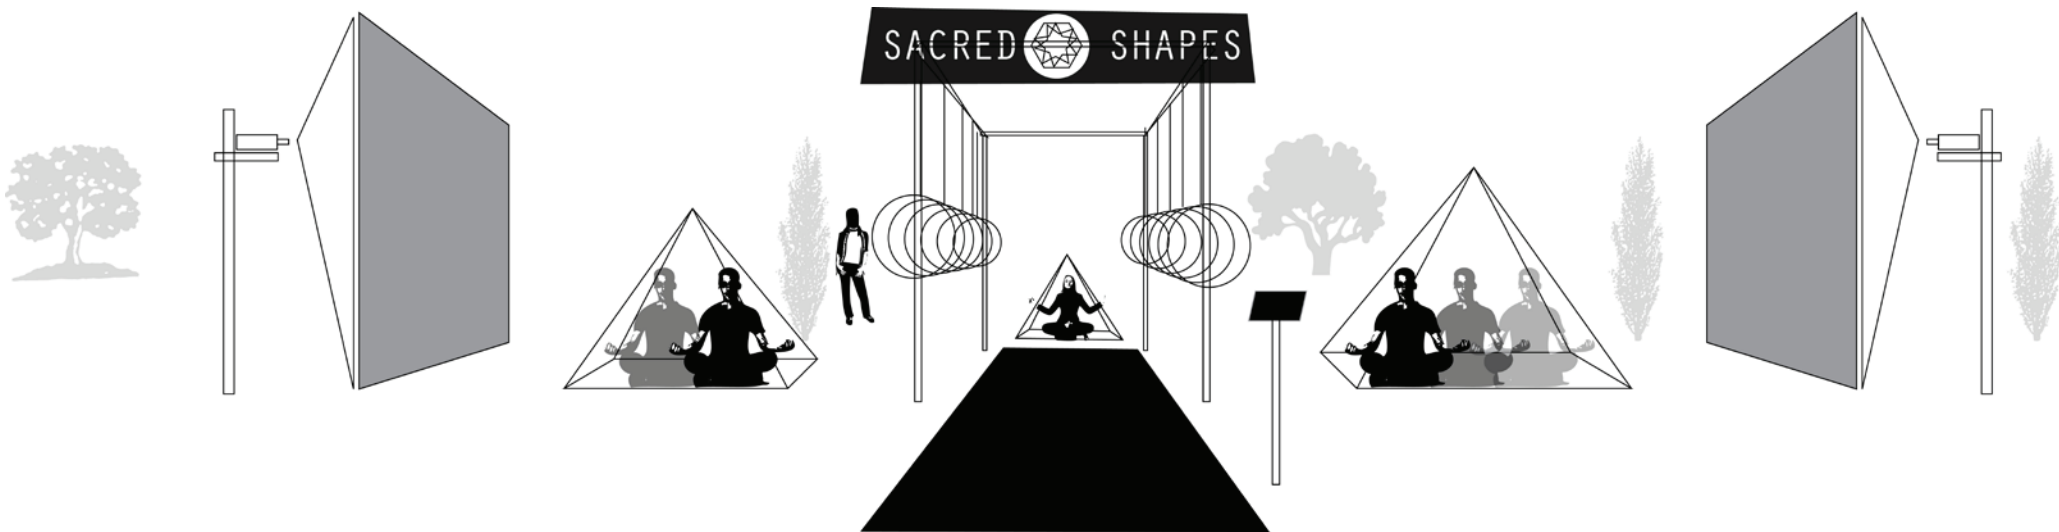

This is an interactive idea.

As you approach the entrance to the Sacred Shapes Installation you will notice (3) giza pyramids surrounding a 12ftx6ftx8ft frame containing 12 hanging sacred shapes for one to interact with. This installation welcomes the idea of people holding the shapes, playing and spinning the shapes as well as sitting within the giza pyramids. The idea of 2 Projection screens will frame in the area showcasing projected sacred shapes and icons overlaid organic imagery during the evening hours. We want to incorporate a small sound system featuring different types of music and handmade lanterns with flickering flameless tea light candles scattered through-out.

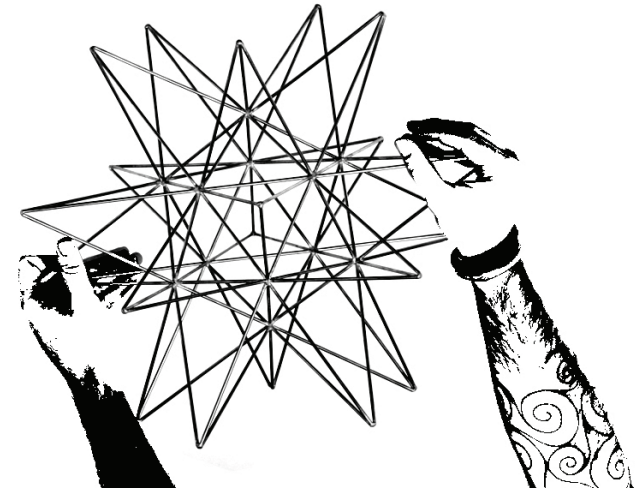

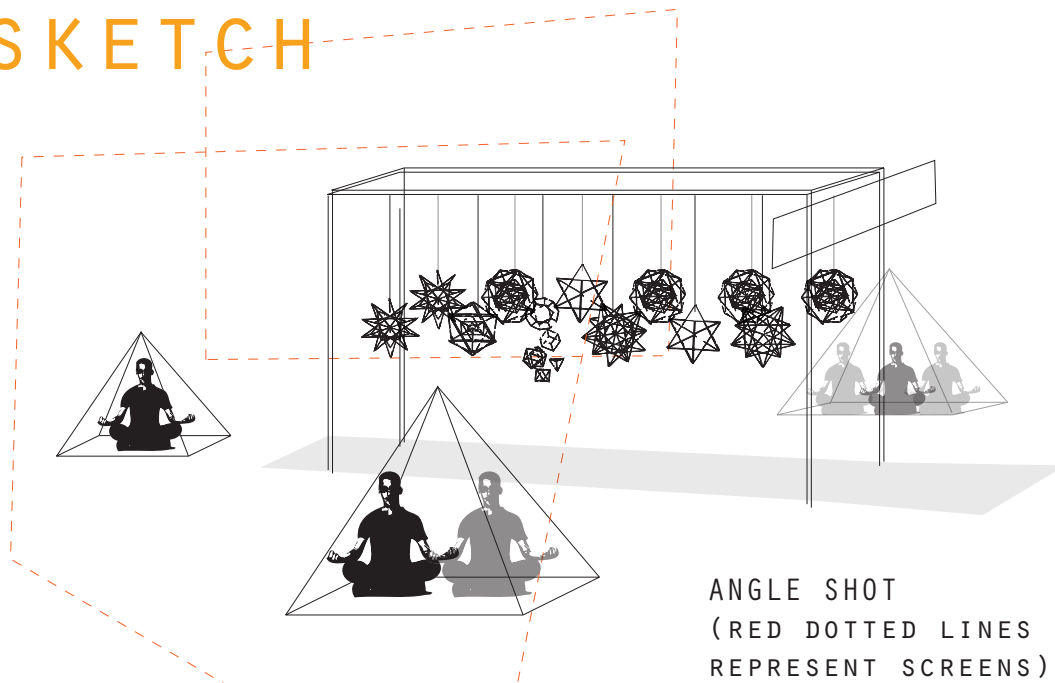

All sacred art used in this piece is for sale and can be retrieved at the end of the festival.

GIZA PYRAMIDS HERE.

Pyramids are very mysterious structures, of which there is still much to be discovered about how they actually work, and of all of the wondrous things that they are capable of doing...like the Great Pyramid, the greatest concentration of energy is located at what is called the King's Chamber. This is also the geometric center of the pyramid, located at one-third up its height from its base. Pyramids act as an amplifier of one's thought energy, thus if you are focusing on a thought or an idea that you want to manifest into your life, it will amplify that thought accordingly. Also, if one is trying to clear one's thoughts, as is done in many forms of meditation, the intent of that thought is amplified, and one can go into a deeper state of focus and peace much more quickly and easily.
